

Privacy & Security

We help businesses, charities, governmental agencies, institutions, individuals, makers of products and providers of services respond to the rapidly changing privacy laws in the healthcare industry. More specifically, we serve banks, hospitals, nursing homes, healthcare providers, medical and trade associations, technology vendors, software developers, developers and providers of communications products and services, data security and processing companies, telemedicine ventures, electronic media providers and e-commerce start-ups in the areas of:

- Alternative dispute resolution and litigation
- ERISA
- EU Directive on Data Protection and US Safe Harbors
- Gramm-Leach-Bliley Act
- Healthcare industry standards, including Medicare and Medicaid
- HIPAA
- Loss avoidance, risk management and insurance
- Medical informatics
- Technologies for encryption, authentication, public key infrastructure and security
- Web privacy matters and e-commerce
